## Summary

Computer Science postgraduate (M.Tech, PES University) with a strong foundation in Artificial Intelligence, Machine Learning, and Deep Learning. Experienced in building end-to-end AI and full-stack applications using Python, TensorFlow, PyTorch, and the MERN stack, with exposure to Generative AI and LLM integration. Passionate about solving real-world problems through data-driven and intelligent systems, with strong analytical and problem-solving abilities.

## Education

**PES University Bengaluru, Karnataka**
*Master of Technology (M.Tech) – Computer Science and Engineering* *Aug 2024 – May 2026*

**Jain College of Engineering and Technology Hubli, Karnataka**
*Bachelor of Engineering (B.E.) – Computer Science and Engineering* *Aug 2020 – May 2024*

## Experience

**Full Stack Web Developer — AI Robosoft Products and Services** Aug 2023 – Sep 2023
*Bengaluru*

- Developed and deployed full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Implemented JWT-based user authentication and RESTful APIs for secure data handling.
- Collaborated with cross-functional development teams, gaining hands-on experience in frontend-backend integration and real-time system communication.

**Full Stack Web Developer — Varcons Technologies Pvt Ltd** Jun 2023 – Jul 2023
*Bengaluru*

- Built responsive, cross-browser web applications using HTML, CSS, and JavaScript.
- Applied front-end frameworks including Bootstrap to develop scalable and reusable UI components.
- Gained hands-on proficiency in core web development principles, version control using Git.

## Projects

**AI-Driven Predictive Healthcare System** | *Python, TensorFlow, PyTorch, OpenCV, Pandas, NumPy, Streamlit*

- Designed and developed a machine learning system for early prediction of Diabetes, Heart Disease, and Chronic Kidney Disease, training and evaluating models across 3 clinical datasets totaling 2,350+ patient records.
- Implemented 1D-CNN for clinical data analysis (up to 95% accuracy) and 2D-CNN for medical image classification with retinal, chest X-ray, and ultrasound images (up to 99% accuracy).
- Integrated Explainable AI techniques (SHAP, LIME) to enhance model transparency and interpretability for healthcare predictions.
- Built and deployed an interactive web application using Streamlit for real-time risk assessment and visualization.

**AI Voice Assistant** | *MERN Stack, Groq API, Generative AI, LLM Integration*

- Built a full-stack, AI-powered voice assistant application using MongoDB, Express.js, React.js, and Node.js.
- Integrated Groq API to enable real-time, LLM-based conversational responses and natural language interaction.
- Implemented speech-to-text functionality for real-time voice input processing and interaction.
- Developed secure JWT-based authentication and enabled customizable assistant configurations for enhanced user experience.

## Technical Skills

**Languages**: Java, Python, JavaScript, SQL, HTML, CSS.
**AI & Machine Learning**: Machine Learning, Deep Learning, Neural Networks, Convolutional Neural Networks (CNN), Natural Language Processing (NLP), Data Preprocessing, Explainable AI (SHAP, LIME).
**Generative AI**: Large Language Models (LLM), Prompt Engineering, Groq API, Claude API.
**Frameworks/Libraries**: MERN Stack (MongoDB, Express.js, React.js, Node.js), TensorFlow, PyTorch, OpenCV, Pandas, NumPy.
**Tools & Platforms**: Git, GitHub, Postman, Streamlit.
